Child Passenger Safety on School Buses National Training

This training is intended to provide an overview of child safety restraint system use on school buses with a focus on preschool-aged children and children with disabilities.

It will include instructional videos, instructor education and hands-on practice.

This class is only for personnel that are Certified Child Passenger Safety Technicians.

This class will help school districts, Head Start programs, childcare centers and busing companies understand their role in transporting children safely in a bus environment.
