

# A SAFER GENERATION OF STROLLERS

## New Federal Requirements

ALL types of strollers and carriages must be built, tested and labeled to minimize issues with:

Latch/lock mechanism failures

Hinges that can pinch, cut, or amputate fingers

Seat belts that allow children to unfasten or escape

Parking brake failures

Broken and detached wheels

ADDITIONAL safety improvements address stroller stability and structural integrity.

**SAFE K:DS**  
GRAND FORKS

All strollers and carriages made after September 10, 2015 must meet new federal requirements for overall stroller safety.
