

On the back side of this sheet we have provided the safest way for your child(ren) to walk or bike to school. Although some routes may appear longer, they have been deemed the safest. Please keep in mind some sidewalks/roads may have construction and this map would then need to be altered temporarily. If you have any questions about this route, please contact the Metropolitan Planning Organization at 773-0124. Hopefully you will use this as a way of planning the safest way for your child to walk to school.

For more, information on pedestrian safety, please contact Safe Kids Grand Forks at chanson@altru.org.
